Research Interests

Machine Learning; Deep Learning; Computer Vision; Vision Transformers (ViT); Convolutional Neural Networks (CNNs); Hybrid CNN-Transformer Architectures; Graph Neural Networks (GNNs); Large Language Models (LLMs); Multimodal Vision-Language Models; Explainable AI for Vision and Language Models; Transfer Learning and Fine-Tuning Strategies; Lightweight and Efficient Model Design; Medical and Agricultural Image Analysis.

Academic Profile

Lecturer and early-career researcher in Computer Science & Engineering with a focused research agenda in Computer Vision, Graph Neural Networks (GNNs), and Large Language Models (LLMs). Developed and evaluated deep learning systems for visual understanding across medical imaging, agricultural diagnostics, and intelligent sensing applications, involving data from X-ray, CT, MRI, retinal, microscopic, and thermal modalities.

Research contributions emphasize lightweight and hybrid CNN–Vision Transformer architectures, attention mechanisms, and explainable AI techniques (e.g., Grad-CAM) for robust and interpretable visual recognition. Complementing vision-centric work, applied transformer-based LLMs and graph-based representation learning to language understanding tasks, particularly in low-resource Bangla settings, including text classification, misinformation analysis, and human–AI text discrimination.

Completed an MSc thesis on the comparative evaluation of CNN-, GNN-, and LLM-based models for radiographic bone fracture classification. Seeking a PhD position to pursue rigorous research on advanced vision and vision–language architectures, graph-structured learning, and interpretable AI systems with real-world impact.

Education

MSc in Computer Science & Engineering (Major: Data Science) 2024 – 2025

Daffodil International University, Dhaka, Bangladesh

CGPA: 3.89 / 4.00

Thesis: *Comparative Analysis of CNN Integrated ML, GNN, and LLM Models for Bone Fracture Classification in Radiographic Images*

BSc in Computer Science & Engineering 2020 – 2024

Daffodil International University, Dhaka, Bangladesh

CGPA: 3.86 / 4.00

Thesis: *Optimizing Vehicle Insurance Processing through Advanced Deep Learning Models*

Selected results from this work have been published in peer-reviewed IEEE and Springer conferences proceedings; an extended manuscript is under journal review.

Academic Appointments

Lecturer (CSE)

January 2026 – Present

Department of Business Administration, Daffodil International University

- Teaching undergraduate course: Programming for Business Analytics (Theory & Lab)
- Strengthening BBA students' computational and analytical skills through Python programming, technology-driven learning to support data-driven decision-making, and organizing programming contests and workshops.

Lecturer

May 2025 – December 2025

Department of Computer Science & Engineering, Daffodil International University

- Teaching undergraduate courses in Discrete Mathematics, Compiler Design (Theory & Lab), Computer Graphics (Theory & Lab), Object Oriented Programming, Art of Living.
- Supervising undergraduate projects and mentoring student research activities

Lecturer (Part-Time)

Jan 2025 – Apr 2025

Department of Computer Science & Engineering, Daffodil International University

- Delivered courses on Data Mining & Machine Learning and Artificial Intelligence
- Supported student research leading to peer-reviewed conference publications

Graduate Teaching Assistant (GTA)

Aug 2024 – Jan 2025

Supervisor: Dr. S. M. Aminul Haque

Department of Computer Science & Engineering, Daffodil International University

- Assisted in course delivery, assessments, and academic coordination

Research Experience

Researcher and Research Supervisor

2023 – Present

DIU NLP & Machine Learning Research Lab

- Conducted advanced research in Deep Learning, Computer Vision, Graph Neural Networks (GNNs), and Large Language Models (LLMs)
- Developed, trained, and evaluated models including CNNs (MobileNetV2, VGG16, ResNet, InceptionV3), Vision Transformers (ViT), GraphSAGE, LSTM/BiLSTM with Attention, YOLO (v8), and LLMs (Bangla BERT, mBERT, DistilBERT, XLM-RoBERTa, DeBERTa, mT5, Bangla T5, GPT-2)
- Applied Explainable AI techniques (LIME, SHAP, Grad-CAM, Grad-CAM++) for interpretable and transparent model predictions
- Designed experiments and pipelines for medical image analysis, agricultural and plant disease detection, NLP tasks, object detection, and scene understanding
- Supervised and mentored junior researchers and undergraduate projects in model development, evaluation, and reproducible research
- Published 50 peer-reviewed papers demonstrating expertise in Deep Learning, Computer Vision, LLMs, and GNNs

Publications

Books

1. *Machine Learning theke Deep Learning Dharona Algorithm ebong Proyog (Machine Learning to Deep Learning: Concepts, Maths and Applications)*

Authors: **Sadman Sadik Khan**, Md Mizanur Rahman, Md Sadekur Rahman, and Aminul Haque.

Year of Publication: 08-03-2026

ISBN Number: 978-984-37-0559-4

Journal Papers

Conducted and developed journal-oriented research targeting high-impact Q1 and Q2 venues, including IEEE Transactions and Elsevier-indexed journals, with a primary focus on deep learning, computer vision, large language models, and graph neural networks. My work advances medical image analysis through bone fracture detection, ovarian cancer diagnosis, and disease classification, while also addressing intelligent vision problems such as vehicle damage assessment and fake image detection. In natural language processing, I design and evaluate LLM-driven systems for author identification, AI-generated versus human text classification, gender classification from text, neural text generation, text summarization, and AI-based text humanization. Across these studies, I implement CNN-based architectures, CNN-ML hybrid pipelines, CNN-GNN and CNN-LLM integrations, transformer-based and LLM-centric models, and thesis-driven research pipelines to support multimodal learning across vision and language domains.

Conference Papers

1. Md Ainul Ahsan Arman, **Sadman Sadik Khan***, Aminul Haque, A S M Mahmudul Hasan, A. K. M. Rafi Uddin and Md Rafi Al Karim, *Analyzing Regional Variations in Bangla Speech: A Voice Classification Approach Using MFCCs*, IEEE, International Conference on Artificial Intelligence and Smart Data for Sustainable Engineering and Innovation (AISEI 2026), April 2026.
2. Md Rezanur Rahman, Shahriar Kabir Arnab, **Sadman Sadik Khan***, Afraz Ul Haque Rupak and Shrikanta Paul, *Road Cleanliness Classification Using Deep Learning and Vision Transformer with LIME-based Explainability*, IEEE, International Conference on Artificial Intelligence and Smart Data for Sustainable Engineering and Innovation (AISEI 2026), April 2026.
3. Adnan Zawad Toky, Faria Afrin, **Sadman Sadik Khan*** and Md. Rony, *A Transfer Learning-Based Pipeline for Diabetic Retinopathy Detection and Severity Classification*, IEEE, 28th International Conference on Computer and Information Technology (ICCIT), December 2025.

Technical Expertise

- **Programming Languages:** Python, C
- **Libraries & Frameworks:** PyTorch, TensorFlow, Keras, Scikit-learn, OpenCV, Hugging Face Transformers
- **Models & Techniques:** CNNs (MobileNetV2, DenseNet121, VGG16, VGG19, ResNet, InceptionV3), Vision Transformers (ViT), Graph Neural Networks (GCN, GAT, Graph-

SAGE, GIN), Large Language Models (Bangla BERT, mBERT, DistilBERT, DeBERTa, XLM-RoBERTa, mT5, Bangla T5, GPT-2), LSTM/BiLSTM, Attention Mechanisms, Transformers, YOLO (v5, v8), Ensemble Learning

- **Explainable AI (XAI) Methods:** LIME, SHAP, Grad-CAM, Grad-CAM++
- **Domains:**
 - *Medical Imaging:* X-Ray, MRI, Retina Scans, Blood Cell Images, Skin Cancer Detection, Pneumonia, Alzheimer's, Lung Cancer, Keratoconus, Colorectal Polyps
 - *Agriculture & Plant Health:* Tea, Moringa, Potato, Eggplant, Tomato, Mango, Olive Leaf, Indoor Plants (Disease Detection, Quality Grading, Maturity Assessment)
 - *Natural Language Processing:* Bangla Text (Sentiment, Gender, Emotion, Fake News, Political Comments, Author Style), Transliteration (Banglish), YouTube Comments
 - *Computer Vision:* Object Detection, Scene Classification, UAV-Based Thermal Imaging, Fruit Ripeness, License Plate Recognition, Vehicle Speed Detection
 - *Cybersecurity & AI Safety:* Malware Detection, Phishing Detection, Cyberbullying Detection
- **Research Skills:** Experimental Design, Data Preprocessing, Model Training & Optimization, Performance Evaluation, Explainable AI, Reproducible Research, Scientific Writing

Academic Service and Leadership

- **Leadership Roles**
 - President, DIU NLP & Machine Learning Research Lab (2023–2024) Led lab activities, coordinated research projects, and supervised student researchers in Deep Learning, Computer Vision, LLMs, and GNNs.
 - Lab Prefect, Daffodil International University (Jan 2023 – Jun 2024, Dhaka, Bangladesh) Assisted faculty in teaching Object-Oriented Programming (Python), Data Mining, Machine Learning, AI, and Research Innovation courses; managed lab operations and student mentoring.
- **Teaching and Training**
 - Trainer, Advanced Machine Learning & Deep Learning Bootcamp (May 2023 – Dec 2023, Dhaka, Bangladesh) Trained 100+ students on ML/DL techniques, guided hands-on projects, and promoted practical research skills.
- **Event Organization and Volunteer Work**
 - Organizer, National Data Analytics Competition (NDAC-25) Managed competition logistics, datasets, and student participation for a national-level event.
 - Organizer, Intra-University Dataset Contest on "Crack Dataset CD-24" Coordinated submissions, evaluation, and judging for student competitions in data analytics.
 - Volunteer, Data Science Olympiad, Conference on Big Data, IoT, and Machine Learning (BIM 2023) Assisted in event coordination, dataset preparation, and participant engagement.
 - Hult Prize On-Campus Champion, Daffodil International University (2020) Led campus-level team for social entrepreneurship competition.
